

Saguaro Blossom

- the Saguaro Blossom is the flower of the Saguaro cactus.
- the cactus first blooms when it is 50 to 60 years old and each blossom lasts only one night.
- waxy white flowers bloom in May and June.
- in July, the flowers become red-fleshed fruits that are food for doves migrating from Mexico and which are made into syrup by some people
- it was made the state flower of Arizona on March 16, 1931.
