

**DIRECTIONS TO MAKE A HEART MOBILE:**

1. Print two copies of this page. Color the hearts and stars with Crayola crayons, markers, or colored pencils.
2. Glue the hearts and stars to a piece of thin cardboard, such as a recycled cereal box or manila folder. Let the glue dry.
3. Cut out all the shapes, and color the back of each.
4. Punch a hole in the top of each shape using a hole punch. Tie pieces of red or pink string to each piece, using different lengths of string.
5. Use the hole punch to punch holes in a recycled plastic lid. Tie the strings to the lid, then hang up your mobile and watch the hearts and stars float!
