

Companions or Opposites?

Discriminating between companions and opposites

Draw a 😊 in the box if the objects are companions (go together). Draw a ☹️ in the box if the objects are opposites.

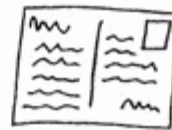

Try this fun "go together" game with your young learner. Hold up a variety of companion objects; for example, socks and shoes, toothpaste and toothbrush. Then ask your child to indicate a matching pair with a thumbs-up signal and an unmatched pair with a thumbs-down signal.
