

# 2024 Solar Eclipse

Moon

Earth

During a solar eclipse, the moon blocks the sun

**Full**

**Partial**

You can see the moon covering some of the sun in these parts of the state

## How to wear eclipse glasses

- Wear the glasses for the entire eclipse (partial and full). Looking at the sun can blind you!
- If the glasses are scratched, torn or damaged, they're not safe to use.
- Only glasses that meet ISO 12312-2 standards will protect your eyes!

**ReadyNH.gov**  
TAKE ACTION. BE SAFE.
