

GOBLIN SHARK

"mitsukurina owstoni"

Location - Pacific, Atlantic & Indian Ocean

Length - 11 feet (3.4 meters)

Diet - Carnivorous

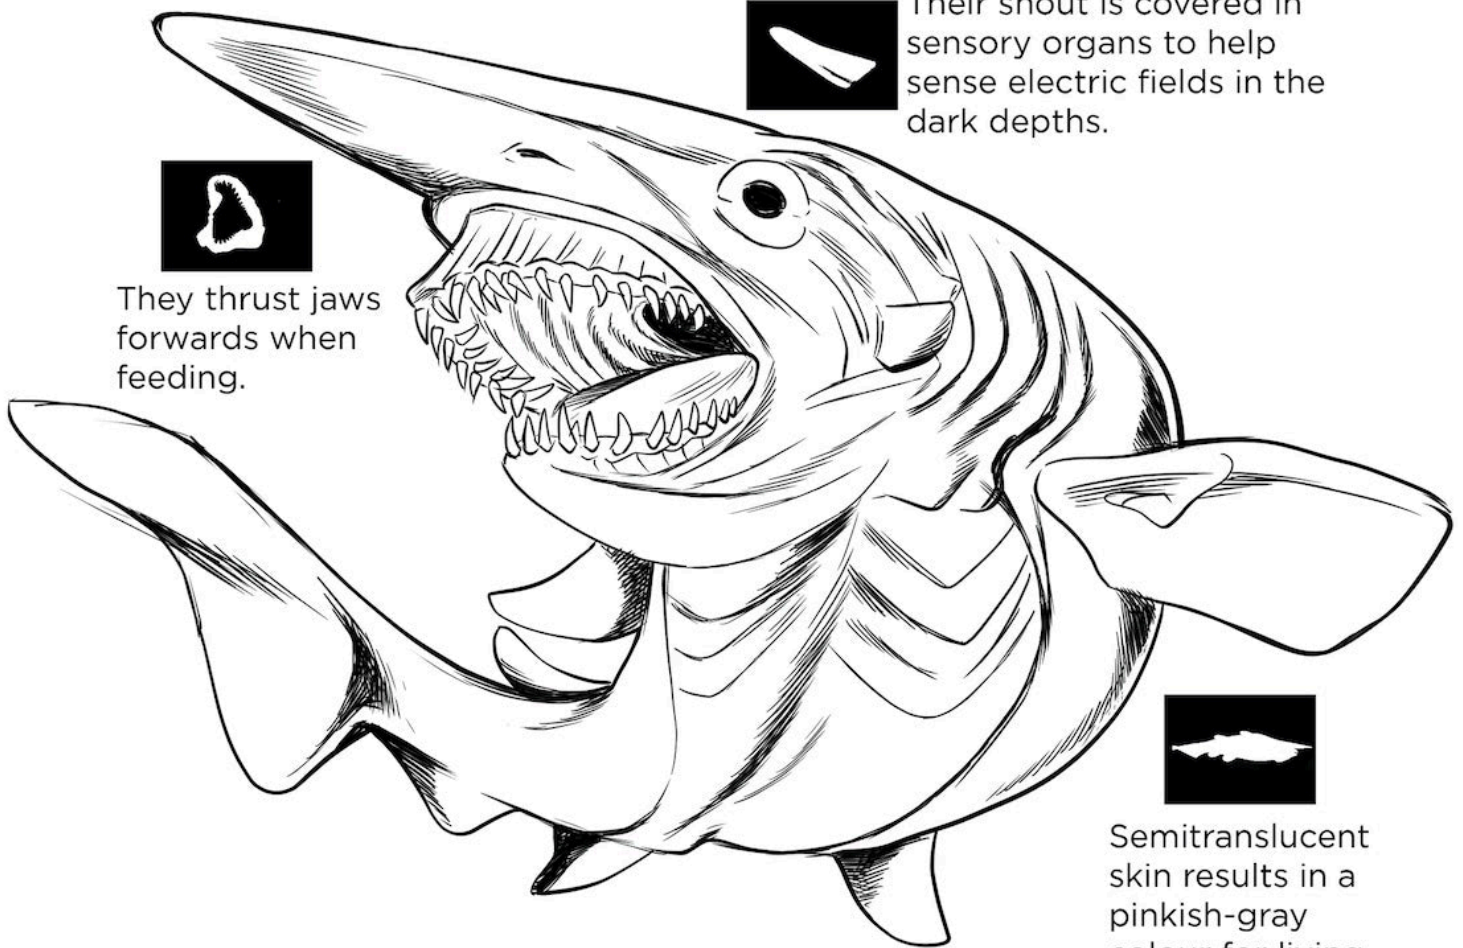

Weight - 330-463 lb (150-210 kg)

Their snout is covered in sensory organs to help sense electric fields in the dark depths.

They thrust jaws forwards when feeding.

Semitranslucent skin results in a pinkish-gray colour for living sharks.
